SUMMARY

Applied AI developer and Final-year CSE student with **two production internships (8+ months combined)** shipping **AI-powered** features in live products — **LLM sentiment pipelines**, real-time dashboards, **video KYC**, and **WebSocket** trading UIs. Built three end-to-end solo tools wiring **OpenAI API** into real editors, booking flows, and dev tooling. Strong in **structured prompting**, **streaming**, and context management. Seeking **AI-integrated** frontend or full-stack roles.

TECHNICAL SKILLS

Frontend	React.js, Tailwind CSS, Three.js, HTML5, CSS3, shadcn/ui
Backend	Node.js, Express.js, REST API's, Socket.IO, WebSockets, JWT
AI & LLMs	OpenAI api, Gemini api, Prompt Engineering, Streaming, Context Windows
Database & Tools	MongoDB (Mongoose), Firebase, Git, GitHub, Vercel, Render
Languages	Javascript, Java
CS Foundations	DSA, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Software Application Development Intern — PMPS GLOBAL, Pune

Jun 2025 – Dec 2025

Medialens – AI-Powered Media & News Analytics Platform

- Integrated **LLM-based sentiment analysis** pipelines classifying brand mentions in real-time; enabled sub-5s trend alerts and automated competitor insight generation.
- AI-driven dashboards **reduced manual reporting by 45%**; optimised React rendering (lazy load + memoisation) **cut load time by 30%**.

Finagle – AI-Assisted Algo Trading Platform

- Built **AI market-trend analysis** modules with pattern-based prompting, **reducing click-to-insight time by 35%**; real-time charts via **WebSocket streams**.

Software Developer Intern (Frontend) — Delishush, Noida

May 2025 – Jun 2025

PigoPi – SaaS Startup Website

- Delivered full frontend of PigoPi.com from scratch; hit **Core Web Vitals** targets (**LCP < 2.5s, CLS < 0.1**). Built reusable Tailwind component library, **cutting future dev time by ~40%**.

PROJECTS

CodeSense — AI-Native Coding IDE

React · Node.js · Monaco Editor · OpenAI API

- Debounced (500ms) real-time AI suggestion** engine with cursor-aware prompts streams inline ghost-text per line (GitHub Copilot-style) via **GPT-4o** — no third-party SDK.
- Structured **AI code-review pipeline**: single prompt returns Summary → Errors → Complexity → **Brute Force** vs **Optimal** → Rewritten Code. **ChatGPT-style panel** with **multi-turn context** and one-click Apply Fix.

VehiMeet — Full-Stack Vehicle Booking Platform

React · Node.js · Socket.IO · MongoDB

- 14-state booking state machine** (DRAFT → TRIP_COMPLETED) with **race-condition-safe transitions**, **real-time GPS tracking** (Socket.IO, 3–5s updates), and ZEGOCLOUD **Video KYC** integration.
- 30+ REST APIs**, **3-role dashboards** (Customer / Partner / Admin), Redis sessions, **Cloudinary storage**, **MongoDB geospatial indexing** — built solo end-to-end.

GitFix AI — LLM-Powered Git Conflict Resolver

React · Node.js · OpenAI API · GitHub APO

- Context-aware LLM prompts** understand both branch intents and **produce semantically correct resolutions** with plain-English reasoning — not a diff tool.
- Batch mode resolves full files in one structured API call with per-block confidence scores; side-by-side **Monaco diff view** with one-click Accept.

EDUCATION

BTech — Computer Science Engineering · GHRCE, Nagpur

2022–2026 · CGPA: 7.71

HSC — Computer Science · Insight Jr College, Nagpur

2020–2022 · CGPA: 9.47

ACHIEVEMENTS

- Won Best Project** in Web Domain at **AI Odyssey Hackathon** beat **40+ teams** with a full-stack application (team).
- Runner-Up** Department project showcase among **20+ groups** recognised for execution quality and presentation.
