SUMMARY

Full-stack developer (React, Node.js, MongoDB) with 8+ months of internship experience at two companies and a track record of shipping production features, AI-powered tools, and data-driven dashboards. Built end-to-end platforms spanning real-time tracking, video KYC, Monaco-based code editors, and AI-driven analysis. Open to frontend and full-stack opportunities.

SKILLS

Frontend	ReactJS, Next.js, Three.js, HTML5, CSS3, Tailwind CSS, shadcn/ui
Backend	Node.js, Express.js, REST APIs, Socket.IO, WebSockets, JWT
Database	MongoDB (Mongoose), Indexing, Aggregation Pipelines
AI / Tools	Gemini API, OpenAI API, Monaco Editor, Prompt Engineering
Languages	JavaScript, Java
CS Concepts	DSA, OOP, DBMS, Operating Systems, Computer Networks
DevOps	Git, GitHub, Vercel, Render, MongoDB Atlas

EXPERIENCE

Software Application Development Intern — PMPS GLOBAL, Pune

Jun 2025 – Dec 2025

Medialens – Media & News Analytics Platform

- Architected real-time dashboards for campaign monitoring and competitor analysis, reducing manual reporting time by ~45%.
- Integrated AI sentiment analysis pipelines, improving brand insight accuracy and enabling sub-5s alert responses to emerging trends.
- Optimized React visualizations via lazy loading and memoization, cutting dashboard load time by 30%.

Finagle – Algo Trading Platform

- Built interactive financial charts and portfolio tracking UI with WebSocket streams, serving live data to user.
- Developed market trend analysis modules, reducing user click-to-insight time by ~35%.

Software Developer Intern (Frontend) — DELISHUSH, Noida

May 2025 – Jun 2025

PigoPi – SaaS Startup Website

- Delivered full frontend of PigoPi.com from scratch; optimized for Core Web Vitals (LCP less than 2.5s, CLS less than 0.1).
- Built reusable Tailwind component library, reducing future feature development time by ~40%.

PROJECTS

CODESENSE — AI-Powered Coding IDE

React · Node.js · Monaco Editor · OpenAI API

"LeetCode + VS Code + ChatGPT in one app." Browser-based coding IDE with Monaco Editor, real-time AI suggestions, structured code review, and chat interface.

- Integrated Monaco Editor (VS Code engine): syntax highlighting, IntelliSense, multi-language support — JS, Python, Java, C++.
- Built debounced (500ms) real-time AI suggestion engine with cursor-aware prompting — inline ghost-text per line, similar to GitHub Copilot.
- Engineered structured review output: Summary → Errors → Time/Space Complexity → Brute Force vs Optimal → Improved Code.
- ChatGPT-style instruction panel with conversation context; one-click Apply Fix, error underlining, theme toggle, code history.

VEHIMEET — Full-Stack Vehicle Booking Platform

React · Node.js · Socket.IO · ZEGOCLOUD

A platform with 3-role architecture (Customer, Partner, Admin), live GPS tracking, Video KYC, and 14-state booking lifecycle — built end-to-end solo.

- Designed 14-state booking machine (DRAFT → ASSIGNED → TRIP_COMPLETED) with race-condition-safe transitions and admin override.
- Built real-time GPS tracking via Socket.IO: 3–5s partner updates, live Leaflet, Openstreet Map, impossible-jump validation.
- Integrated ZEGOCLOUD Video KYC: session creation, room generation, reviewer panel with Verified/Rejected/Reschedule decisions.
- 30+ REST APIs, role-based dashboards, Redis session state, Cloudinary storage, MongoDB geospatial indexing.

GITFIX AI — Intelligent Git Conflict Resolver

React · Node.js · OpenAI API · Monaco Editor

Developer tool that parses Git merge conflict files, uses AI to understand both branch intents, and suggests the semantically correct resolution — not just a diff tool.

- Parses conflict markers to extract HEAD vs incoming blocks and structures them for AI analysis.
- Context-aware AI prompts resolve conflicts with plain-English explanations; one-click Accept Resolution + manual override.
- Side-by-side Monaco diff view; batch conflict mode resolves entire files in one API call with per-block confidence scores.

EDUCATION

BTech in Computer Science Engineering — GHRCE, Nagpur

2022 – 2026 | CGPA: 7.49

HSC in Computer Science — Iinsight Jr College, Nagpur

2020 – 2022 | CGPA: 9.47

ACHIEVEMENTS

- Won Best Project – Web Domain at the AI Odyssey Hackathon (team) for innovative full-stack AI application, competing against 40+ teams.
- Secured the runner-up position among 20 groups from the department with a successful project — standing out for execution quality, presentation, and impact.
